

PREDICT FAILURES. PREVENT DOWNTIME.

REVOLUTIONIZE SAFETY, PRODUCTION
AND PROFITS WITH IIOT

NEW GRACESENSE™ PREDICTIVE MAINTENANCE SYSTEM

The field-proven GraceSense™ Predictive Maintenance System of IIoT smart devices combine low-power wireless smart sensor technology with advanced data analytics to help asset managers maximize impact of their maintenance budget and protect their assets' health. GraceSense™ technology improves productivity and reduces unplanned downtime in any industrial application by remotely monitoring equipment and issuing SMS or email alerts when anomalous or problematic behavior is detected. **For more information on this product, contact your local sales representative and/or distributor.**
